

Sprint Plan 3
Project Plan: X2 Web Portal
Team Name: X2Force
Completion Date: July 16, 2018
Revision Version: 1.0
Revision Date: July 16, 2018

High level goal: For this sprint, the main goal is to add more of GrapesJS toolset into the blank HTML page as well as get the button to link to the blank HTML page. Also getting the display URL button to work and have the name field give an alert rather than reloading the page and having the user lose all progress of what they wrote.

User Stories:

- **User story 1** - As an X2CRM administrator, I want to be able to have drag and drop template options using GrapesJS so that I can customize my web page. **(13 Story Points)**
- **User story 2** - As an X2CRM administrator, I want a button to be able to link me to a new webpage that will be blank and contain GrapesJS so I can create my webpage. **(13 Story Points)**

Task Listing:

Task 1 - Make the “Go to Webpage” button render a new HTML page.

Task 2 - Integrate more GrapesJS tools with the HTML page, with at more styling and drag and drop options for users to style their page. (Extension of User Story 2)

Task 3 - Display URL for the web page last update.

Task 4 - Getting the name field to not reload the page every invalid input, but just display alert.

Team Roles:

Clifton Chiang -Working on getting the “Go to your webpage” button to link to the blank HTML page with GrapesJS on it. (extension of second sprint)

Justin Toyomitsu - Helping others with their tasks. After polishing the display url button.

Justin Law - Working on getting the create button to not reload page on invalid error.

Shawn Chumbar and Pulkrit Sood - Understanding more about GrapesJS, and extending GrapesJS functionality so that users may have drag and drop options at least, along with styling options. (done on local server)
