

Release Plan
Project Plan: X2 Web Portal
Team Name: X2Force
Release Name: Project Release
Release Date: July 25, 2018
Revision Version: 1.0
Revision Date: July 17, 2018

High-Level Goals: We want to be able to integrate GrapeJS into this web portal page that we are creating within an app. We want the user to be able to implement web page elements using GrapesJS and to implement our apps' specific tools into the webpage using GrapesJS. Lastly, we want to have GrapesJS be able to create specific buttons and other items that were developed for this app.

User Stories for release:

As a {user role}, I want {feature} so that {reason}

Sprint 1:

As a developer, I need to be knowledgeable in PHP and GrapesJS in order to properly create the necessary features for the webpage

Sprint 2:

As an X2CRM administrator, I want to be able to have be able to drag and drop templates, enough to allow me to create a very basic webpage with no HTML knowledge.

Sprint 3:

As an X2CRM administrator, I want to be able to have be able to drag and drop templates, enough to allow me to create a very basic webpage with no HTML knowledge.

As an X2CRM administrator, I need to be able to have the URL to my webpage displayed so that it can be used to access my webpage when I have finished creating it.

Product Backlog:

- To generate a valid public link that non-X2CRM users can access.
- Integrating X2CRM's tools with GrapeJS.
- Show error message when user tries to create invalid webpage name (includes characters other than letters, numbers, spaces, and dashes. And not refresh page when doing so.
